

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## CONTENTS

<i>Education, Science and Leadership: LORD SYDENHAM</i> .....	477
<i>Agricultural Text-books for our Public Schools: DR. H. NESS</i> .....	484
<i>Fred Silver Putney</i> .....	486
<i>Von Adolf Erich Daecke: H.</i> .....	487
<i>Scientific Events:—</i>	
<i>The United States Public Health Service and the Influenza Epidemic; Foreign Delegates to the American Clinical Congress; Divisional Officers of the American Chemical Society</i> .....	487
<i>Scientific Notes and News</i> .....	489
<i>University and Educational News</i> .....	490
<i>Discussion and Correspondence:—</i>	
<i>Insidious Scientific Control: PROFESSOR EDWIN BIDWELL WILSON. Nematodes on Marketable Fishes: DR. H. P. K. AGERS-BORG. Papers "to be published": DR. HORACE GUNTHER</i> .....	491
<i>Quotations:—</i>	
<i>Masks in Gas Warfare</i> .....	495
<i>Scientific Books:—</i>	
<i>Conn's Agricultural Bacteriology: PROFESSOR E. G. HASTINGS</i> .....	496
<i>Birth Statistics in the Registration Area of the United States</i> .....	497
<i>Special Articles:—</i>	
<i>The Hydrogen Ion Concentration necessary to inhibit the Growth of Four Wood Destroying Insects: DR. MERLE R. MEACHAM.</i>	499

MSS. intended for publication and books, etc., intended for review should be sent to The Editor of Science, Garrison-on-Hudson, N. Y.

## EDUCATION, SCIENCE AND LEADERSHIP<sup>1</sup>

THE British Science Guild has sustained a grievous loss by the sudden death of Sir Alexander Pedler, who for eleven years was its valued honorary secretary. To all the work of the guild he brought wide experience and ripe knowledge. He gave his time freely to its service, and he has been a wise counsellor and a true friend during its early years. He died, as he would have wished, while engaged in work for his country.

Professor Gregory has dealt with our annual report and the objects at which we have aimed in the past year; but there is one matter to which I wish to direct special attention. The war has forced upon us the necessity for efforts to establish the manufacture of many articles formerly obtained mainly or entirely from abroad. Among such products and appliances are synthetic dyes, pharmaceutical and medicinal preparations, glassware and optical instruments, medical and surgical apparatus, and other important requirements alike of peace and of war. The fiction, if it existed, that German science was an essential factor in manufactures of this kind has been permanently dispelled. The guild is organizing an exhibition of British scientific products in order to show what has recently been accomplished by British science and industry. His Majesty the King has graciously consented to be patron of this exhibition and Lord Crewe is its president. The exhibition will be open at King's College next August, and we hope that it will effectively demonstrate the successful application of British scientific research and ingenuity brought into play to meet the needs of the war, as well as prove conclusively that our dependency on Germany in certain departments of industry can be overcome.

<sup>1</sup> Presidential address to the Annual Meeting of the British Science Guild, June 19, 1918.
